

1958 INDEX of Design Engineering main feature articles

Article	Month	Page	Article	Month	Page
Accumulators, hydraulic	MARCH	53	Fibreglas cordage	SEPTEMBER	59
Adhesive, Eastman	JANUARY	33	Filter plates	OCTOBER	52
Automation, positioning	DECEMBER	43	Flexible coupling (Metalastik)	NOVEMBER	47
			Flexible coupling (Para-flex)	MAY	43
Bearing, torque-free	OCTOBER	70	Flexibility tester	DECEMBER	44
Belt conveyors	JANUARY	28	Flowmeter (C-Mar Corp.)	MARCH	82
Blow forming	JUNE	64	Flowmeter (Fischer & Porter)	MARCH	45
Brakes, Power-Safe (Warner)	JANUARY	27	Fuel monitor	DECEMBER	58
Brazing, filler materials	JUNE	65			
Bushings	MAY	54	Gate-valve redesign	NOVEMBER	54
			Gear design	APRIL	62
Carbide tools (Wesson)	JANUARY	36	Germanium thermometer	JUNE	55
Capillary tubing	NOVEMBER	58	Graphite	OCTOBER	50
Casting alloy, Tens-50	MAY	58			
Castings, case histories	NOVEMBER	48	Hand controls	SEPTEMBER	56
Castings, light alloy	AUGUST	33	Harmonic drives	FEBRUARY	68
Centreless brushing	MARCH	50	Harrier car	SEPTEMBER	58
Centrifugal casting	OCTOBER	56	Honeycomb aluminum core	APRIL	58
Ceramic honeycomb structures	DECEMBER	41	Honeycomb structures, ceramic	DECEMBER	41
Ceramoplastics	JANUARY	40	Hortonclad	SEPTEMBER	72
CL 41 (Canadian)	MAY	74	Hydraulic accumulators	MARCH	53
Cleating	OCTOBER	56	Hydraulic symbols	MARCH	56
CO ₂ process for cores	APRIL	49			
Coffin car (Harrier)	SEPTEMBER	58	Induction heating	JUNE	51
Controls, hand	SEPTEMBER	56	Industrial design (U.K.)	AUGUST	62
Couplings, flexible	MAY	43	Impact extrusions	SEPTEMBER	70
Couplings, miniature	MAY	50			
			Kettle, Westinghouse	DECEMBER	46
Data sheets, Knob types	OCTOBER	76	Knob types (data sheet)	OCTOBER	76
Data sheets, Laminated plastics	SEPTEMBER	52			
Data sheets, log mean temp. diff.	DECEMBER	61	Laminated plastics	SEPTEMBER	49
Data sheets, Section properties	MAY	67	Laminated plastics (data sheet)	SEPTEMBER	52
Data sheets, Section properties	JUNE	79	Level gages	MAY	39
Data sheets, Section properties	AUGUST	53	Light alloy castings	AUGUST	33
Data sheets, Shear bolts	NOVEMBER	81	Load cells	MAY	48
Derived areas	MAY	44			
Design, stamping	DECEMBER	50	Miniature couplings	MAY	50
Design Eng. Show (Chicago)	MAY	52	Missile, weight	DECEMBER	70
Die casting, vacuum	SEPTEMBER	45	Models	MARCH	46
Diesel pile-driver	OCTOBER	49	Molybdenum, forged	NOVEMBER	53
Disc motor	APRIL	76			
Drag impeller	APRIL	51	Nickel alloy coatings (Niphos)	FEBRUARY	72
Drawing board, adjustable	APRIL	74	Nickel silver powder	SEPTEMBER	62
Dust collectors	JANUARY	34	Nylon applications	OCTOBER	45
Dynaweld	JUNE	61			
			Optical properties, plexiglas	DECEMBER	54
Electronic chauffeur	DECEMBER	60			
Epoxy resins	NOVEMBER	64			
Extrusions, impact	SEPTEMBER	70			

INDEX—CONTINUED

Article	Month	Page
Para-flex flexible coupling	MAY	43
Pile driver, diesel	OCTOBER	49
Plastic tooling	APRIL	59
Plastic wheel (ORF)	JUNE	58
Plastics, laminated	SEPTEMBER	49
Plastics, laminated (data sheet)	SEPTEMBER	52
Plexiglas, optical properties	DECEMBER	54
Polyethylene (Tenite)	NOVEMBER	43
Positioning system	DECEMBER	43
Powder metallurgy	NOVEMBER	51
Power-operated manipulator	NOVEMBER	56
Powerupter (H.K. Porter Co.)	MAY	37
Precision balls	APRIL	55
Propeller performance	JANUARY	25
Pump, sealless	MARCH	53
Rotoforming	JUNE	62
Roton bearing	SEPTEMBER	48
Sealant (Loctite)	DECEMBER	53
Sealing, high temperature	SEPTEMBER	74
Seals for engines	MARCH	41
Section properties (data sheet)	MAY	67
Section properties (data sheet)	JUNE	79

Article	Month	Page
Section properties (data sheet)	AUGUST	53
Shear bolts (data sheet)	NOVEMBER	81
Silicone ducting	OCTOBER	53
Snap rings	JUNE	56
Spray nozzle	NOVEMBER	74
Spring design	JUNE	67
Stamping design	APRIL	52
Stamping design	DECEMBER	50
Stresscoat	NOVEMBER	59
Temperature control	FEBRUARY	66
Temperature measurement	FEBRUARY	48
Tens 50 aluminum castings	MAY	58
Thermocouples	FEBRUARY	44
Thermostats (Dahlen)	FEBRUARY	48
Thermostat design (Gilbraith)	FEBRUARY	33
Torque-free bearing	OCTOBER	70
Torsion bars	SEPTEMBER	55
Towers, antenna	OCTOBER	55
Transistors	OCTOBER	60
Turco 4367	SEPTEMBER	63
U.K. industrial design	AUGUST	62
Valve redesign	NOVEMBER	74
Vulcanized fibre	OCTOBER	72
Waterwheel generator	SEPTEMBER	60
Welding (Dynaweld)	JUNE	61

FACTS YOU should know about malleable iron

FACT No. 2 . . .

Design Adaptability

Because malleable iron is poured from molten metal, it lends itself to the casting of a great variety of intricate shapes over an extensive range of weights and sizes. Often a single malleable iron casting will displace a complete aggregation of stamped, forged and other bolted or riveted parts. In fact by designing your parts for casting in malleable iron you can get better looking, stronger and more streamlined parts — and at the same time increase production and reduce costs.

Why not look into the possibilities of malleable iron in your products? Galt Malleable representatives will be glad to consult with you and suggest ways in which malleable iron will serve you better. Just write us a line and we'll get in touch with you. SEE WHAT MALLEABLE IRON WILL DO FOR YOU.
